2.3.2 RELEVANCE TO THE PARTICULAR NEEDS AND CONSTRAINTS OF THE TARGET COUNTRIES, REGIONS AND/OR RELEVANT SECTORS (INCLUDING SYNERGY WITH OTHER EU INITIATIVES AND AVOIDANCE OF DUPLICATION)

Please provide all the following information:

1. Identify clearly the specific pre-project situation in the target countries, regions and/or sectors (include quantified data analysis where possible).

The project proposal includes cross-border region, consisting of four Black Sea regions, with the following administrative centers: Komotini (Greece), Burgas (Bulgaria) and Odessa (Ukraine). The target territory, which includes the three Black Sea regions covers a total of 2085 sq. km / Burgas - 254 sq km; town of Komotini - 645.km., town of Odessa - 237 square meters /. The total population living in the target area is 1.257 million people and is distributed as follows: 52 000 citizens from the region of Komotini, 198,000 inhabitants in the region of Burgas, 1 007,000 inhabitants in the region of Odessa. Each region has the resources and potential to develop cultural activities in the area and unique cultural heritage, which identifies him as an important cultural center with national and international significance.

Each community within these regions is potentially interested in creating a common cultural environment in which to unite the most competitive and attractive elements of culture from the four regions. The creation of a common cultural area will improve the quality of life and make the Black Sea region more attractive and viable.

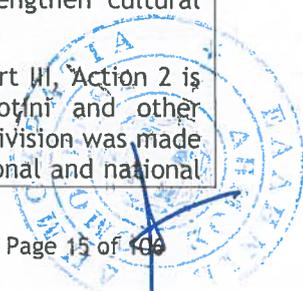

In developing the proposal partners held informal preliminary study in their regions on the presence of cross-border structures in the target Black Sea region supporting the development of cultural cooperation and intercultural dialogue. The lack of such a structure and a regional network for cooperation in culture led to the willingness of the partners to join their efforts to implement the project idea. Each of the partners explore local, regional and national documents, information materials and practices in the region, which confirmed the need for a common cultural area - the Black Sea area for art and culture.

2. Provide a detailed analysis of the problems to be addressed by the joint Action and how they are interrelated at all levels. In addressing this point, refer to any significant plans undertaken at national, regional and/or local level relevant for the joint action and describe how the joint action will relate to such plans.

The project aims to mobilize the resources and the great potential for development of culture in the three Black Sea regions and to unite all stakeholders in sustainable network. This will overcome the deficits in terms of cohesion and a common cultural policy for the development of the target Black Sea area.

The lack of common cultural policy and common cross-border structure prevents both to overcome the problems in communication and intercultural dialogue in the region and to unite the great cultural resources to create a common cultural environment. The creation of cross-border network for culture and art and Black Sea Cultural Center will enhance the regional cultural exchange which will lead to the creation of integrated cultural products. This will strengthen cultural relationships and cultural dialogue between the people in the target region.

In the Strategic Development Plan for 2011 of the Municipality of Komotini in Part III, Action 2 is set "Promoting cross-border cooperation between the Municipality of Komotini and other municipalities in the border states." In 2011 a new administrative and territorial division was made in Greece. As a result of this reform new programming documents for local, regional and national

Programme funded by the

development is currently being developed, which is expected to be laid down measures to expand cross-border cooperation, including the Black Sea region.

The project complies with the Municipal Development Plan of the Municipality of Burgas, Bulgaria for the period 2007 - 2013, Priority 4, Measure "Development of cross-border and transnational partnerships," Activity "Building cross-border and transnational networks" as well as Regional Development Strategy of Bourgas 2005 - 2015, Priority 6 Measure "Joint activities for environmental protection and preservation of cultural and natural heritage on both sides of the border."

Development of cross-border cultural cooperation is set as a priority activity in the development strategy of the city of Odessa "Basic directions in the socio - economic development of the city of Odessa 2010-2015", Section 9, Paragraph 1, "Storage and enrichment of the traditions and promoting the city as a center of multinational culture". 3. Demonstrate the relevance of the joint action to the particular needs and constraints of the target countries and regions, and how the results of the joint action shall have a cross border impact on the area.

There are significant opportunities for interaction between cultures in the Black Sea region and potential for creating a common cultural area for cooperation.

The historical interactions, geographical proximity and increased economic and social contacts make Black Sea countries natural regional actors in joint cultural policies and processes.

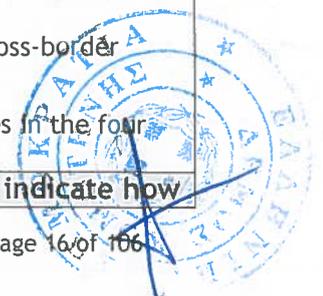

At present there is no identity of the target region as a common cultural space, effectively using the general advantages and potential for the creation of integrated products and integration of institutions, NGOs and citizens to the common cultural values. Overcoming these deficiencies will create a new positive image of the target region.

The development of Black Sea area of culture and art, including the stakeholders from the region will enhance the attractiveness of the Black Sea region and will create additional opportunities for its economic and social development.

The project will contribute to:

- Creation of partnerships between stakeholders in the region;
- Better knowledge of the opportunities and positive effects of cross-border cooperation in the sphere of culture in the Black Sea region;
- Establishment of a common database for cultural organizations and artists from the region, facilitating communication between them;
- Creation of sustainable instrument for improvement information exchange and communication between different areas in the Black Sea region;
- Increase knowledge of partners for the preparation and implementation of joint cross-border projects;
- improving the mutual awareness and understanding of traditions and cultural values in the four target communities;

4. Where the joint Action is the continuation of a previous Action clearly indicate how

Through the implementation of joint cultural events in the four regions it is expected to increase the attractiveness and competitiveness of the Black Sea area, which is one of the objectives of the Strategy.

The European Union develops a strategy for the Black Sea region, according to European Parliament resolution of 20 January 2011, which will offer up to date policy of regional cooperation in the Black Sea region.

Programme funded by the
EUROPEAN UNION

There is a need to change the traditional attitude of non-governmental cultural organizations and cultural institutions, art groups and individual artists in cultural policy at local and regional level in this region. Interested parties declare a desire to combine local resources and create rich and varied products that will develop the capacity to implement a common regional cultural policy. Rich cultural heritage and deep cultural roots in European cultural traditions can be a conductor and values-based culture of the regions of the United Nations of the Black Sea. Here are common flaws in the strategy of cultural development at regional level and in the management of transfrontier local structures that act as an intermediary between the general provision of cultural goods in the border region and the needs of users of these cultural products. The project will provide new sources of funding and supporting the development of arts and culture at regional level. Also today, lacking a common communication medium, in which non-governmental organizations, cultural organizations and cultural institutions, artistic form and individual artists, civil society organizations to share their experiences, receive information about cultural processes in the Black Sea region, to acquire an innovative experience to develop its activities and create high-quality cultural products. Today, not demonstrated the uniqueness of Greek, Bulgarian and Ukrainian elements of cultural identity that can be developed and implemented in the form of a common cultural product. This leads to a lack of joint projects and initiatives in the Black Sea region. The lack of an organized system of cooperation in the field of arts and culture in the Black Sea region limits the local communities in four countries. Cultural activities, most of the local communities remain unknown to other communities in the Black Sea region.

3. Demonstrate the relevance of the proposal to the needs and constraints of the target groups and final beneficiaries and how the joint Action will provide the desired solutions, in particular for the targeted beneficiaries.

During the joint activities under the project will be provided an information environment in the Black Sea region, which will strengthen inter-cultural dialogue and will help to change attitudes and increase cultural cooperation between local NGOs, cultural institutions, art and individual artists in the Black Sea region. The project will motivate professional groups, artists, journalists, local intellectuals to participate more actively in the information and cultural exchange of the best practices and policies of other countries. The project will support the convergence of the citizens and the population of the three countries and the promotion of cultural dialogue between organizations and operators of the network of the three communities. Planned activities will help create common cultural products, which will increase its demand. This will create a positive attitude in the Black Sea community to achieve the overall cultural policy in the Black Sea region. Through the implementation of activities under the project on capacity building and human resource development will increase the competence of people involved in the management of cultural and institutional organizations, and improve operational capabilities. Established within the framework of the Regional Network for Cultural Cooperation is an innovative initiative that will be sustainable model of long-term partnership with multilateral development trends in other areas. The project will motivate the participation of children and youth in the study of the cultures of other nations and the preservation of cultural traditions in the Black Sea region. The project will address specific problems: the episodic in contacts between cultural institutions, cultural organizations, network operators and individual artists, the lack of prospects in its relations with other organizations, the lack of information on resources and the experience of other communities in the Black Sea region. The project promoter: Komotini Municipality, the organization partners: Association "Platform AGORA - Active

Communities for Development Alternatives - Branch Burgas" and the Agency for Support of Cultural Initiatives "KusiCreaVision" will gain experience in the creation of regional partnerships ties and will receive information about positive and modern forms of organization that meet the new demands. Create a lasting multilateral partnership between three communities will facilitate contacts between cultural organizations, artists, and individual artists of four the Black Sea countries.

1. Background to the preparation of the joint Action

Joint project activities have been proposed by the Applicant organization from Komotini. Then, the general idea was discussed with the preliminary partners - organizations from Burgas, Odessa and Corlu. In recent years, there are increasing demand and new opportunities for the formation of regional partnerships and cross-border networks of the Black Sea countries in the field of culture. The idea of the project is to create an environment for art and culture in the Black Sea region, which would reflect the growing interest and understanding of the values of other organizations, other communities and nations and despite the borders would allow the conduct of joint actions. This particularly affects the community of the Black Sea region, which are traditionally linked by common historical roots and cultural phenomena. Expansion of cultural cooperation is one of the biggest opportunities for the sustainable development of the Black Sea region. This project is one of the possibilities for such development.
