NEXT Black Sea Basin

BSB00026 Regular project

Co-Resilience

**Cooperation for wildfires community resilience capacity
building and early warning in the Black Sea Basin**

Overview

The Black Sea region is vulnerable to wildfires due to its diverse climate, topography, and vegetation. Climate change is a key driver of wildfire intensification. The project aims to enhance community resilience, improve coordination, and mitigate wildfire impacts. The project partners aim to protect communities and ecosystems, promote sustainable management practices, and reduce vulnerability to wildfires.
