Co-funded by  
the European Union

**NEXT** Black Sea Basin

**BSB00354 Regular project**

**ecosySTEM**

**Empowering Children for Environmental  
Sustainability through E-STEM**

## Overview

The project aims to address environmental degradation and lack of education in the Black Sea region by fostering environmental awareness and sustainable development among children and youth. The initiative will develop innovative training modules and curriculum materials, establish training centers, and provide specialized training for educators.
