# EXPECTED RESULTS

- An **integrated environmental monitoring system** to ensure proper measures to protect the population of the Black Sea Basin exposed to various natural hazards, to avoid or reduce risks and to prepare effective responses;
- A **management plan** for environmental protection;
- An **online common integrated platform** to share the data gathered from the environmental system;
- A **mobile application for environmental protection for youth** to learn environmental protection measures to be taken, and also information on how to act during notable risks such as earthquake, floods and forest fires;
- An **innovative technology web solution** for rapid response to crises, simultaneous registration, allocation and pooling of volunteer groups, training and demonstrations to deal with unforeseen accidents or disasters;
- Specialized **equipment** to improve the capacities of public authorities from Black Sea Basin in addressing the common challenge regarding environmental and other risks hazards.
