EXPECTED RESULTS

- **Hot Spots Black Sea tool** through the implementation of the methodology for identification and prioritization of Hot Spots;
- **Decision-making tool** on the adaptive criteria for monitoring of the maritime activities impact;
- **Joint Scientific Research** organized having in mind harmonized methodologies and the need to include in the assessment new/common criteria and indicators related to biodiversity, eutrophication, contamination, marine litter and also areas beyond the coastal areas in a representative and efficient way;
- **Pilot study** on the quality of Black Sea seafood for new data on chemical contamination of aquatic organisms and potential risks, thus filling knowledge gaps identified for the Black Sea region;
- **Educational and awareness-raising** campaigns based on the findings following the case studies on beach litter and cetaceans.
